

THE IMMEDIATE, GRAVE DANGER OF GENOCIDE

The US and the world are facing an immediate grave danger. The State of the Union address demonstrated that Obama is completely out of control, Lyndon LaRouche said today. The speech was a total fraud, and anyone accepting Obama's lies is opening the United States up for total destruction. On behalf of the British, Obama is ready to blow up the United States altogether. This is an immediate option. The Wall Street issue is actually a cover for the fact that the United States as a whole is being set up for genocide. This is the British policy of genocide, and the current Pope has been thoroughly suckered into this British genocide scheme.

It's not just Obama who's doing the killing; Obama is only the lead dog. It's the British,— the British Empire.

And of course people are frightened; maybe they're not frightened enough. But in any case, we have to say what we have to say.

This is the secret of the massive COP21 "climate-change" conference in Paris last November-December, with its estimated 50,000 participants representing 196 nations. But no binding treaty could possibly be reached,— what was its purpose then? It was the mass-declaration of intention for

this genocide. It was to rally the troops for the scheduled "big kill." It was the Dance of Death.

And this Pope's May, 2015 encyclical, calling for humankind to be sacrificed for the sake of the "climate," was exactly the same thing. This Pope has come under British direction and control; he's being used by a British operation. He's committing crimes.

Worldwide terror attacks by the British-Saudi spawned ISIS are the same thing,— as in Paris, in California, and now in Jakarta,— the latter the first ISIS attack in Southeast Asia. The Tuesday, Jan 12 bombing in Istanbul, Turkey, whose Muslim Brotherhood-controlled government is friendly to ISIS, has been especially murky. The victims were German tourists, and the German mass media openly cast doubt on the Turkish government's account of their investigation. And German television says that there is "no evidence" for the Turkish government's claim that it has killed 200 ISIS militants across the border in Syria in retaliation.

The thrust of the genocide is aimed squarely at the trans-Atlantic region. But along with it goes the British threat to destroy Asia by war. This is what Obama is doing in the western Pacific; the Russians understand this completely.
