

TRUMP HAS FALLEN FOR A BRITISH WAR-COUP; AMERICANS MUST REVERSE IT

April 11, 2017—The President of China was literally at his side offering partnership in a rapidly developing new paradigm of productive economic growth, scientific progress and future optimism, which the depressed American population desperately need. Instead, President Donald Trump was duped by the British imperial, "unipolar world" illusion and the British obsession with getting America to go to war.

The shocking complete reversal by the President, within a single week, of his years-long strong opposition to the Bush-Obama disaster of regime-change wars, was brought about by British frauds. The fraudulent claims of Russian control of Trump have all originated in British intelligence "reports" and "dossiers," and have caused him to lose control of his own National Security Council and caused his few allies in Congress to capitulate. Throughout Trump's short presidency British officials have incessantly demanded "alliance" military attacks on Syria and new sanctions against Russia. With the President's March 30 announcements that his policy was not to "regime-change" Assad in Syria, the British and American allies like Senators McCain and Rubio went into a fury, and seized on the "Idlib chemical weapons bombing" in Syria. That itself may well have been a hoax, whose ONLY source of evidence is the British intelligence-created and -funded "White Helmets" who operate in Syrian territories controlled by jihadi extremists.

EIR Founding Editor Lyndon LaRouche has warned since the day Libyan President Qaddafi was overthrown and assassinated by a British-French-Obama coup in 2011, that these regime-change wars were marching toward the target of a world war confrontation with Russia, especially, and with China. Trump was determined to end that threat; now with his Brit-

ish manipulation, it has returned with a vengeance.

As LaRouche noted, now President Trump must hold a summit meeting with Russian President Putin to reverse this British world war March. Indeed, the Kremlin has said that Putin will not meet Secretary of State Tillerson in Moscow on Wednesday, although Tillerson has been holding out against the disastrous regime-change policy. There must be a Trump-Putin summit.

We are seeing the President duped by British imperialism, the imperialism we fought our Revolution against, and the Anglo-American "world policeman" dogma which President Franklin Roosevelt rejected.

The American people now have to rally against regime-change war -- as they did in 2013, when they stopped Obama from bombing Syria. But more: they must rally *for* the idea President Trump had started to espouse, the "American System of economy" going back to Alexander Hamilton; to Clay and Lincoln; and today meaning partnership with China's New Silk Road and carrying out LaRouche's "four laws to save the nation."

That is the purpose of the Schiller Institute's two-day conference in New York City this Thursday and Friday; and the purpose of the nationwide mobilization of activists to throw pressure on the White House. Trump must clean his house of the British-agent advocates of war confrontation with Russia; and return to the campaign for the American System.
