

BRITISH UNLEASH "PANAMA PAPERS" TO ESCALATE REGIME CHANGES GLOBALLY, PROVOKE WAR

The release of thousands of documents from a Panama firm long involved in setting up shells for tax avoidance for the elites around the world, called the "Panama Papers," is transparently an operation set up and run by the British and their stooge Obama, funded by their favorite drug money launderer, George Soros, to the purpose of extending their "regime change" operations around the world. Several points should be noted, as documented below:

- * The firm is run by the son of a former Waffen SS officer who went to work for the CIA after the war, and was eventually shipped off to South America, as were thousands of Nazis, under the auspices of Allen Dulles's "ratline" of former Nazis who collaborated with the CIA to "fight communism";

- * The second partner was earlier the head of the party in Panama which was responsible for one of the CIA's early "regime change" operations -- the removal of Manuel Noriega by the US military. That party was itself run by a member of the Nazi movement over several decades;

- * the highly selective release of the documents is aimed at orchestrating unsubstantiated attacks on Vladimir Putin and Xi Jinping, as part of Obama's escalation towards thermonuclear war against Russia and China.

Lyndon LaRouche immediately identified the operation as a British/Obama scam, but made the point that any effort to run "color revolutions" against either Russia or China is a fool's game. The

reality is that the entire western financial system is disintegrating, while the vast majority of the world's population is turning to China and Russia, who, between them, are offering grand-scale infrastructure development and security against terrorists created by the British/Obama regime-change process, which has turned nation after nation into failed states.

Even in the United States, the LaRouche organization has observed a phase-change in the population, sparked in large part by the organization itself. The combination of a fight to restore Classical culture, characterized by the free concert by the Schiller Institute Chorus on Easter Sunday, performing Handel's Messiah in the classical tuning of c=256 in a beautiful Brooklyn church, together with a national campaign to restore NASA and the space program led by LaRouchePAC leader Kesha Rogers, and the mobilization over the past weeks for an international Schiller Institute Conference titled "Building A World Land-Bridge --Realizing Mankind's True Humanity," to be held in Manhattan on April 7, have captured a demoralized American population with a sense of optimism for the future, of what can be created by a creative people.

The time is short. A failure to grab this moment of opportunity, to create a new paradigm based on the common aims of mankind, will result in a new global war which could spell the end of civilization as we know it. The time to act is now.
