

## OBAMA OUT-FLANKED—DO AMERICANS HAVE THE COURAGE TO DRIVE HIM OUT?

President Barack Obama, who, like his predecessor George W. Bush, has fully embraced the terrorist networks created by the Saudi and British Royal Families as collaborators in colonial "regime change" operations, is now off to bow and kiss the feet of the world's most prolific killers, King Salman of Saudi Arabia and the bloody Queen of England and the British Commonwealth.

But, the explosion into the public eye this past week of Obama's personal role in hiding the Saudi's direct role in the terrorist attack on the United States on 9/11, contained in the 28 pages of the Congressional 9/11 report which Obama has refused to declassify, has placed Obama on a course to self destruction, proving to the world that he is himself complicit in international terrorism.

If Obama refuses to declassify the 28 pages, he confirms his treason against the United States (and the world) for covering up the British/Saudi terrorism. If he chooses to declassify the 28 pages, it will demonstrate that he, like Bush, worked hand-in-hand with the Saudi-controlled terror apparatus, and therefore also confirms his treason against the United States.

Those many cowardly Americans who knew Obama has committed multiple crimes against the Constitution, but who claimed it was "not practical" to impeach him or force his removal under the 25th Amendment, must now denounce their own subservience to "practicality" and join

with LaRouche in demanding the truth, regardless of the consequences.

The CBS "60 Minutes" program on April 10 which blew the cover on the Obama/Bush cover-up of the Saudi role in 9/11, identified former FBI Director Robert Mueller as the individual who demanded the classification of the 28 pages. Not surprisingly, it was the same Robert Mueller who headed the "Get LaRouche Task Force" in the 1980s which railroaded Larouche and several of his associates to prison, desperately (but unsuccessfully) trying to break the power of the LaRouche movement in identifying the crimes of London, Wall Street, and their political assets in Washington, such as Bush and later Obama, and posing a future for America and the world based on development, scientific progress and the fostering of creativity in every human being.

Now, the bankruptcy of the Wall Street "too big to fail" banks is no longer hidden. The West's financial oligarchs are screaming for negative interest rates and "helicopter money" to keep them afloat for a few more days or weeks. This bankruptcy is the driving force behind the British/Obama push for war on Russia and China. Only the removal of Obama, now—not after an election which has no candidates even qualified to be president of the US—can this disaster be prevented, creating the pre-conditions for a new world order based on the common aims of mankind.
