

The World Is Responding to LaRouche, Targeting the British Empire

April 23, 2017—The Russian and Chinese press this week made a point of covering the campaigns of the LaRouche movement to bring the Trump presidency to bring the United States into the New Silk Road paradigm of Xi Jinping's Belt and Road Initiative, while also increasingly identifying the role of the British in subverting Trump's efforts to bring the U.S., Russia and China into cooperation for the betterment of mankind. At the same time, political institutions in the U.S. are moving toward collaboration with the LaRouche organizations -- the Schiller Institute, the Executive Intelligence Review, and the LaRouche Political Action Committee (LPAC).

On Saturday, representatives of the Schiller Institute and members of a New Jersey based Tea Party organization joined forces in front of the New York Times -- or, as President Trump correctly identifies it, the "failing New York Times." Signs at the protest included: "The New York Times wants war with Russia, Americans want peace;" "The New York Times - all the fake news in print;" and a poster with the portrait of Goebbels blushing, with the words: "The New York Times Makes Goebbels Blush."

An article in TASS that evening wrote: "'The whole world laughs at The New York Times,' Daniel Burke, spokesman for the Schiller Institute, said in an interview with a TASS correspondent. 'They have become miserly servants of those who seek war and chaos.' In his opinion, the publication 'spreads lies about Syria just as it lied about the presence of weapons of mass destruction in Iraq. This is part of a cynical and false campaign to change the regime in Syria -- this can easily lead to a third world war,' Burke said." Ruptly, an RT connected video service, posted a video of the rally.

Also on Saturday, China Daily published a long ar-

ticle, with pictures, reporting on the April 13-14 Schiller Institute Conference in New York City, titled "Belt and Road Initiative 'new platform' for Sino-US cooperation," reporting on presentations by Dr. Patrick Ho, founder of the China Energy Fund, Deputy Consulate General of the PRC in New York Zhang Meifang, and Deputy Permanent Representative to the UN from Russia Peter Ilichev, who all spoke with Schiller Institute Chairwoman Helga Zepp LaRouche.

EIR has now commenced a daily video channel on Youtube, dedicated entirely to exposing the direct British role in both subverting any cooperation between the U.S., Russia and China, and using every conceivable lie to manipulate the U.S. into a war against Russia and China -- a war which could immediately end civilization as we know it. We encourage everyone to subscribe to EIR's new Youtube Channel.

President Trump, in his meeting with President Xi Jinping on April 6-7 in Florida, accepted Xi's invitation to visit China, but without setting a date for the visit. While such a visit is of extreme importance for the future of mankind whenever it takes place, Lyndon and Helga LaRouche have strongly encouraged the President to attend The Belt and Road Forum for International Cooperation, which will be held in Beijing on May 14, 15. Were he to attend, Trump would be able to meet with both Xi Jinping and Vladimir Putin, along with 26 other heads of state who plan to attend the forum, in an environment aimed at creating cooperation for development between the nations on our shared planet. The world must act now to achieve such a new paradigm for world development, as the necessary basis to end the British system of geopolitical military confrontation once and for all, and create a new Renaissance dedicated to the common aims of mankind.
