

THE 2018 MIDTERMS ARE HUMANITY'S BIG CHANCE

Don't Blow It on a Bunch of Crazies George Soros Pays For

November 6, 2018: The Last Big Chance for All of Humanity?

In the election of 2018, what are the actual stakes? If you only pay attention to the stupid media, or partisan policy lines, you probably have no idea and could be so frustrated you might stay home. That would be a huge mistake. We have a chance in this election to destroy the British Empire, the monster which, along with its American servants, has been a destructive force against most of humanity since the end of World War II. Franklin Roosevelt tried to end this murderous menace to the world when the great war ended, telling Winston Churchill that Americans would no longer die on behalf of British imperial aims. Instead, FDR proposed to use the great industrial power of the United States to develop all of humanity. When Roosevelt died, Harry Truman made his deal with the devil instead; the "special relationship" was created.

In 1989, the Berlin Wall fell, ending the Cold War and providing a big chance, once again, for a renaissance of new collaborative scientific discovery, economic development, worldwide technological progress, and high culture — based on sovereign relationships between nation states. That was championed by Lyndon LaRouche and others. Instead, George H.W. Bush, Margaret Thatcher, and Francois Mitterrand conspired to create the "New World Order" of globalization, free trade, and relentless austerity against the

great mass of humanity. The United States was deliberately deindustrialized and speculative money was either invested in more funny money or in the cheapest sources of labor available anywhere on earth. The post-industrial hell of drugs, pornography, gambling, and Hollywood entertainment took over our former industrial centers, while the socially atomized world of

cellphones and video games replaced human communication. Small, but perpetual wars were undertaken to police and cull whole populations.

Donald Trump proposed to end this. He campaigned in support of Glass-Steagall banking separation, ensuring that you and I won't pay for Wall Street's next

financial collapse. He seeks mutually beneficial trade relationships between developing nations, rather than the globalist system which imprisons everyone. He has referred to the American System of political economy, invented by Alexander Hamilton, fully employed by Abraham Lincoln, and wielded by Franklin Roosevelt to create the greatest economic power the world has ever known, the arsenal of democracy developed in America during World War II. He seeks sane relationships with both Russia and China, ending Obama's insane efforts at regime change in Russia and hostile isolation of China.

But Trump has been blocked at every turn by the British instigated coup against him because the Brit-

ish and their American servants view him as a mortal threat to their Empire.

Whether that coup continues and destroys this nation is up to you.

If you vote for the Democrats on November 6 and don't support candidates who support Trump, you will be voting for the insanity and anarchy which you just saw in the Kavanaugh hearings — politicians paid for by George Soros and a host of New York and California billionaires who will impeach the president and have no program other than continuous chaos and violence in support of their views.

If you vote for the Democrats on November 6 and don't vote for candidates who back Trump, we will also lose what may be our last chance to remove the disease of Empire from the earth — our chance to do justice for the millions of unnecessary deaths caused by this disease and to prevent a new war which could kill us all.

In their frantic coup against Trump, the British and their American co-conspirators have acted recklessly, exposing whole chunks of the Anglo-American police state apparatus, the propaganda machine aimed at keeping the population distracted, demoralized, and docile. This was supposed to remain hidden. In their hysterical and McCarthyite attacks on Trump, the entire legacy media apparatus and Hollywood entertainment empire have been exposed as nothing but one mass brainwashing machine.

We now know, as the result of Congressional investigations, that the entire Russiagate operation was a fraud, paid for by the Clinton campaign but created and run as a continuing psychological and information warfare attack by the British government against the American President. That is why the British government has thrown a fit about President Trump's order to declassify the documents underlying the Justice Department's illegal investigation against the President. Removing Trump is one of their goals. Subjugating Russia and China is another. This effort can only result in a new World War.

President Trump needs a constituency who will passionately seek to enact Lyndon LaRouche's Four Laws for Economic Recovery of the United States: Glass-Steagall banking separation, national banking in the form of credit institutions like Hamilton's National Bank or Lincoln's Greenbacks, direction of the credit so created to massively fund modern infrastructure and a makeover of America's economic platform for the economy of the next 50-100 years, creating thousands of high paid and skilled jobs, and a crash program for fusion power development to move humans to the next level of economic progress. That is the basis by which the President can truly succeed. It is the basis of LaRouche PAC's Campaign to Secure the Future. Can you really afford not to join this campaign?
