

# The Green Nazi International and the Second Stage of the Coup

After Mueller's witch-hunt investigation failed so spectacularly, Phase Two of the attempted coup against the President has begun. LaRouchePAC analyst Barbara Boyd laid bare the British intelligence roots of this new "Green" phase Tuesday evening, in LaRouchePAC's Fireside Chat livestreamed conference call (see below), as she did so successfully earlier, for Phase One, with her report, "Robert Mueller Is an Amoral Legal Assassin: He Will Do His Job If You Let Him," issued in September 2017.

Her preview for the presentation Thursday night states: "Almost as soon as the 'Russia, Russia, Russia!!' attack on the U.S. Presidency collapsed with Robert Mueller's mentally vacant Congressional testimony, a new narrative, a new phase of the coup was put into place, complete with actual violent choreography and the killing of innocents. This attack emanates from the same British imperial forces and psychological warriors who invented the myth of Russiagate. It is not just an attack on Trump designed to ensure his defeat in 2020. It is an attack on the entire nation's ability to reason about and assess reality, as the world's economy teeters on the edge of yet another collapse. Most of all it is targeted at our youth—those who, historically, have brought about great and historical change at major turning points in history, such as the crisis we now face. President Trump said this week, correctly, that a change in culture was urgent, and he is clearly trying to figure out how to do that."

The ideology with which the mass-shooters have been supplied, is a variety of Green Fascism. Even if mere commentary and appearances would have you believe otherwise, the reality is that the synthetic belief-structure linked to the El Paso shooting suspect and others, is closely intertwined with the increasingly dictatorial and violent international "Green" movement, supposedly against man-made "global warming," against which Helga Zepp-LaRouche, president of the Schiller Institute, has been warning sharply during recent weeks.

The 16-year-old figurehead leader of that Green

movement, Sweden's Greta Thunberg, is clearly unaware that her campaign is being funded by Warren Buffett, the Gettys, and others among the richest people of the world. That it is actually headed up by the financiers' City of London and its banks. Now, as in the 1920s and 1930s, their financial system is coming under immediate threat. Now, as then, they are trying to extend dictatorial control over all world investment streams, this time under the banner of "green," "sustainable" investment. Now, as then, they are lining up to back an international fascist movement. It is a different movement this time, but not that different—remember that the original Nazis were also "green."

Now, as then, Russia, China and the U.S. are potential obstacles. President Vladimir Putin recently openly rejected this sort of "environmentalism." China is building both coal power and nuclear power plants, both domestically and in power-starved developing countries in Africa and elsewhere. President Trump has taken the U.S. out of the Paris Climate Accord.

The preview for last night's presentation ends on this note: "As usual, Lyndon LaRouche has given us a solution—the Moon-Mars Mission which President Trump has endorsed and which our collaborators must now make the central issue of the coming Presidential campaign. Identity politics, biological determinism, zero population growth ideologies, and green ideologies are the historical tools of Empire, as LaRouche emphasized when he founded this political movement. By contrast, the human capacity for creative reason is at play if the public mind and imagination is engaged in the crash program to go to the Moon and Mars, the actual natural state of the human mind.

"Lawfully, minds so engaged, minds with the joy in discovery and curiosity of childhood, will not tolerate the irrational, pessimistic, and cynical talk now parading as our public discourse. This can be the spark for the necessary cultural change. Join us for tonight's discussion as we campaign to make this happen."
