

# The Punctum Saliens Is Upon Us— The LaRouche Time Is Now

As we move into the month of September, the crises striking every part of the world, and every part of society, have created a condition like that described by Dickens in his novel on the era of the French Revolution: “It was the best of times, it was the worst of times, it was the age of wisdom, it was the age of foolishness, it was the epoch of belief, it was the epoch of incredulity, it was the season of Light, it was the season of Darkness, it was the spring of hope, it was the winter of despair...”

Bank of England Governor Mark Carney prepared for the inevitable financial crisis likely to explode in the fall by proposing the insane “solution” to his peers at the Jackson Hole meeting to dump the dollar and turn to the “libra” cryptocurrency being set in place by Facebook and the Lords of the dying Western financial system, while former New York Federal Reserve Bank President Bill Dudley joined the House of Lords in demanding that these same Lords do whatever necessary to stop a Trump re-election.

New York, meanwhile, will be under siege in September by the UN climate quacks and their Jacobin street mobs, headed by the pathetic, abused child Greta Thunberg and the LSD-peddling Extinction Rebellion, demanding an end to human progress and the depopulation of the human race.

Israel, meanwhile, is preparing for an invasion of Lebanon and possibly even Iran, while U.S./British-funded and trained Jacobins in Hong Kong are using mass violence and subversion to provoke a hoped-for military confrontation between the U.S. and China.

And yet, the President of the United States openly opposes the Federal Reserve control over the U.S. economy and the WTO subversion of sovereignty; openly demands the end of British-inspired neo-colonial wars and seeks a pullout from those started by Bush and Obama; and openly rejects the fake science of the climate change fanatics. Why has he been unable to implement his intentions?

Here is where the exoneration of Lyndon LaRouche is fundamental. LaRouche identified the evil and unconstitutional nature of the Federal Reserve as early as the 1950s, and denounced the WTO when it was founded in the 1990s as an attack on sovereignty and development; exposed the anti-science and anti-human Green Movement as it emerged from the eugenics movement after World War II; exposed the role of the British in using the U.S. as a “dumb giant” in fighting its colonial wars, starting with the Vietnam fiasco in

Southeast Asia and continuing with the Bush-Obama wars in Southwest Asia.

More importantly, LaRouche also posed the necessary solutions to these disasters—solutions which have thus far eluded President Donald Trump, either because he hasn’t fully grasped their urgency, or because he has been repeatedly and forcefully blocked in his efforts to implement them.

The one area where Trump has been successful in reversing the subversion of American science and technology is in his Kennedy-esque declaration of a crash program to return to the Moon by 2024, and to prepare for colonization of the Moon and a mission to Mars. The LaRouchePAC petition calling for support for this mission, however, goes beyond Trump’s declaration, to pose the necessary measures for the mission to succeed: a crash program to develop fusion power propulsion to travel to Mars; bring all of the space-faring nations together to achieve both the space mission and the fusion effort; and “reform or eliminate the speculative and predatory aspects of the international financial system,” so as to have the necessary credit mechanisms needed for these projects.

Cooperation among these space-faring nations is the seed-crystal for the LaRouche solution to the global crisis—together, the U.S., Russia, China, India, Japan, and those European layers still dedicated to scientific progress, cannot only achieve the “extraterrestrial imperative” of human development of the Solar System and beyond, but also represents the needed political force to end the tyranny of the British financial system and its Empire, bringing about a New Bretton Woods creditary system to build the world, as the Chinese Belt and Road has shown the way, while also saving the advanced sector nations from the depression and decay facing it today from the bankrupt City of London and Wall Street gambling dens.

Trump has the capacity to put this entire program before the American people by declaring the exoneration of Lyndon LaRouche, who, of course, was falsely accused and prosecuted by exactly the same persons and institutions that have now been exposed for their treasonous efforts to depose the President himself, through “Russiagate” and other illegal means. All of this is both urgent, and imminently possible. While it is seen by pessimists as “the worst of times,” it is up to us, as “patriots of our nation and citizens of the world,” to make it the best of all possible worlds.
