

Spread the True Ukraine Story behind Coup vs. President Trump; Stop Hong Kong 'Maidan' vs. China

One week into the impeachment media circus against Donald Trump, whose goal is to carry out a coup d'état against the elected President of the United States, the battle lines are emerging clearly. There is a total war between two, diametrically opposite "narratives" about the strategic situation and the Trump Presidency, Helga Zepp-LaRouche emphasized yesterday. Our job is to hit the coup operation on its weak flank, by exposing the truth of the Ukraine matter: That the British Empire and the Obama Administration—emphatically including Vice President Joe Biden and his son Hunter—orchestrated a Nazi coup d'état in Ukraine in early 2014, the "Maidan revolution," both to destroy that country and to threaten the very existence of Russia as a sovereign nation.

When Russia responded to defend itself, and Crimea voted to return to being a part of Russia, that was then used to set into motion the chain of events including economic sanctions, further expansion of NATO eastwards to Russia's borders, and other attacks on Russia, that have made it next to impossible for President Donald Trump to develop a good working relationship with that country, which is his stated goal.

Earlier this week, two members of Ukraine's Verkhovna Rada, Deputies Andriy Derkach and Oleksandr Dubinsky publicly presented further revelations about the sordid Nazi coup, including accusations that the \$16.5 million reportedly paid to Hunter Biden by Burisma energy company, was itself money that had been stolen by Burisma owner Mykola Zlochevsky from the Ukrainian people. That story, whose details remain to be confirmed by independent investigation, has been frenetically blacked out of the U.S. and international media—including shutting down Twitter accounts that dared to report the matter—lest the story break the intended

controlled environment of media brainwashing of the American people during the impeachment circus.

Now the British and their American allies have launched a similar violent "Maidan revolution" in Hong Kong, this time to force China to intervene to defend its essential, strategic interests in a way that can then be used to further drive a wedge between President Xi Jinping and President Trump. As an editorial in the semi-official Global Times stated yesterday, Hong Kong faces a threat to be "erased from the modern world," which would constitute an existential threat to China itself and will not be tolerated.

Into this fast-moving strategic situation, in which the trans-Atlantic financial system is disintegrating and the fate of future generations is being decided in the coming weeks and months, Executive Intelligence Review has announced the publication of its new strategic pamphlet to expose the anti-China hysteria as part of the coup attempt against President Trump. The 24-page pamphlet, "End the McCarthyite Witch Hunt Against China and President Trump" is available on the EIR website, and it presents the LaRouche policy alternative to the war and economic collapse which the bankrupt British Empire is otherwise imposing on the planet.
